PU Conveyor Belt

The polyurethane material is used in preparing the PU conveyor belt. These belts are used in various industries like textile, packing, paper, food processing, etc. The PU conveyor belt are made in various specifications and dimensions. They are even available in different colour as per the request of the suit the application area.

PVC Conveyor Belt

The PVC conveyor belt is prepared from high quality poly vinyl chloride and it is a highly stretchable material. They are made as per the standard dimensions. The size of the belt is also provided as per the need of the client to effectively suit the amount of product that has to be transferred. They are even preferred before the rubber belts as they are able to stretch more than rubber.

Resistant Conveyor Belt

The resistant belt are used in various industries where they need resistance from some specific kind of condition or atmosphere effect. We offer various kind of resistant conveyor belt like:

- ✓ Oil Resistant Conveyor Belt
- ✓ Fire Resistant Conveyor Belt
- ✓ Cold Resistant Conveyor Belt
- ✓ Heat Resistant Conveyor Belt
- ✓ Flame Resistant Conveyor Belt
- ✓ Abrasion Resistant Conveyor Belt
- ✓ Chemical Resistant Conveyor Belt

Fire Resistant Conveyor Belt

The fire resistant conveyor belt is used in the industries that need to work with high temperature and flames. They are useful in many industries like mines and thermal power plants.

The fire resistant conveyor belt has great property to the bare temperature and fire. We prepare the belt from best materials and even check them under various testing conditions to ensure their effective working.
